

Projection Mapping

- Video projection in which video footage is mapped onto a surface to create one of a kind looks and effects to enhance the attendees experience
- Surfaces that we may map on include but are not limited to - vignettes, venue walls, ceilings & floors, bars and bar backdrops, any shapes or décor
- Turn 3D objects into interactive displays - we are able to add interest and the *wow factor* into the space by adding video footage in theme of the event onto objects/surfaces in the room
- For a more advanced art installation - we have a fantastic fabrication partner that can create stunning pieces for your event. We will engage your attendees with a remarkable experience which is fully customizable to fit the theme of the event
